PROJECTS

Customer Shopping Behavior Analysis | Python, Pandas, SQL, PostgreSQL, Power BI *Jun 2026 – Jul 2026*

- Analyzed 3,900+ customer purchase records using Python, Pandas, SQL, and PostgreSQL to uncover spending patterns and revenue drivers across customer segments, subscription tiers, and shipping preferences.
- Identified key purchasing behaviors across product categories to surface factors influencing sales performance.
- Built an interactive Power BI dashboard with KPI cards, slicers, and drill-through filters, translating raw transactional data into a self-service reporting tool for revenue and behavior trends.
